A Diet of Eggs.

Deekin Pogram swors that he woodent vote for Hancock, nohw. Hancock wore a bloo uniform doorin the war, and he (Pogram) hed suffered too much by the subjoogashen up the South to support any man wich hed assistid in the subjoogashen.

Issaker Gavitt woodent vote for Hancock, becox he bleeved that Tilden shood hev been nominatid, or some Dimekrat ekally able to open a barl or two.

Bascom didn't like the nominashen for he hed, ex yit, seen no indicashen uv any expenditoors for the cox.

Capt. M'Pelter remarkt that the nominashen uv Hancock wox a betrayal uv the South, becox Hancock hed born arms agin the central ijees of Southern Democrisy.

I hed one reply to make to these misgidid men, wich I did. Ez to the barl, there wux other barls besides Tilden's. The fereshen shower will come, and the Corners winsi git all that it is entitled to.

Now the event of this article of food. It is not uninteresting to have the opinion of a popular medical writer in France upon the merits and demerits of a diet of eggs. After explaining the chemical composition of a hen's egg, and laying due stress upon the large proportion of albuminous matter contained in it, Dr. Valoureux goes not a seer that some prudence should be exercised in indulging an appetite for eggs. Of all the 600 different modes of preparing them for the table, the most whole-some is that of simply boiling them a law of the french of the work of the more thanked the some is that of simply boiling them a law of the proportion of altheory and in proportion of a here's egg, and laying due stress upon the large proportion of a benefical writer in Junction of a hen's egg, and laying due stress upon the hemits and derived in the merits and deer explaining the chemical composition of a hen's egg, and laying due stress upon the merits and dere explaining the chemical composition of a hen's egg, and la

A Apropos of this latter warning the Frenchman might have added, if he had known it, a very modern Devonshire story of a laborer who was ordered by the village doctor to eat eggs, and whose employer gave him a shilling to enable thim to comply with these orders without going to any unwarrantable expense. A few days alterwards the good natured employer called to ask how the sufferer was. He had followed out the doctor's injunctions with alacrity, but, instead of being rany better, was a great deal worse; and further inquiries elicited the fact that he had bonght eighteen eggs with his shilling, and had at once set to and finished them at a slitting.

But Hancock will git the northern votes necessary to elect him, and er he will doo our work jist the same ex a southern man, what-difference is it to us? I don't keer what yooniform a sojer wore in the war, so that he does wat we want him to do now.

We want Post Offices, and appropriashens, and ef we elect Hancock we git em, and ef we elect Hancock we git em, and ef we don't Let us be ass wise as serpints anyhow, jist now, and the dove biznis we will consider hereafter. The friends took another view uv the matter after my remarks, and decided that after all it wood be better to support Hancock corjelly. All uv us agreed to go to lajeany in time to vote there in October, pervided allux the funds wux fortheomin. Issaker Gavitt sez he will manage to git in five good votes, and Captin McPelter is skally enthoosiastic. The Corners is all rite sgin, and the Dimocrisy may look for a good report from lingeany. I shel organize for that State towunst. The skies is britenin.

For You, Madam,

Whose complexion betrays some humiliating imperfection, whose mirror tells you that you are Tanned, Sallow and disfigured in countenance, or have Eruptions, Redness, Roughness or unwholesome tints of complexion, we say use Hagan's Magnolia Balm. It is a delicate, harmless and

delightful article, producing the most natural and entrancing tints, the artificiality of which no observer can detect, and which soon becomes per-manent if the Magnolia Balm is judiciously used.
